IN THE FOURTH DISTRICT COURT - ALL DEPARTMENT  
IN AND FOR UTAH COUNTY, STATE OF UTAH

---

**AFFIDAVIT FOR SEARCH WARRANT**

STATE OF UTAH )

:ss

County of Utah )

The undersigned affiant, Detective MICHAEL GEORGE CARLE of Utah County Sheriff's Office, upon an oath or written affidavit subscribed under criminal penalty, declares:

That your affiant has reason to believe:

THAT

On the premises known as Service Provider 1:

T-Mobile and subsidiaries (i.e. Mint mobile, Metro, Sprint, etc.)

Attn: Court Order Team

4 Sylvan Way

Parsippany, NJ. 07054

Fax: (973) 292-8697

Service by email: LERINBOUND@T-Mobile.com

Service Provider 2:

AT&T and subsidiaries (i.e. Cricket, etc.)

ATTN: AT&T Wireless National Compliance Center

11760 US Highway 1, Suite 300

North Palm Beach, FL 33408

Fax: (888) 938-4715

Service by email: glcdc@att.com

Service Provider 3:

Cellco Partnership d/b/a Verizon Wireless and subsidiaries (i.e. Visible, Tracfone, etc.)

Verizon Security Assistance Team (VSAT)

Attn: Custodian of Records

180 Washington Valley Road

Bedminster, NJ 07921

Fax: (888) 667-0026

Service by email: VSAT.CCT@one.verizon.com,

In the City of Orem, County of Utah, State of Utah, there is now certain property or evidence described as:

NOTICE: This warrant application seeks judicial authorization for the disclosure of reverse-location information of electronic devices near a crime at or near the time of the crime. If authorized, the warrant allows law enforcement to obtain historical location information of all devices within the area described in the warrant during the specified time from entities in possession of the relevant data. The electronic devices captured in the warrant may be owned or used by both alleged criminal perpetrators and individuals not involved in the commission of a crime. For this reason, any warrant issued must require the anonymization of all devices associated with the reverse-location information.

1. Historical cellular site call detail records and stored text message transaction data (a.k.a. cellular tower dump), including, but not limited to: All incoming/outgoing calls; and/or originating or terminating numbers involving both phone numbers associated with the usage event (who's calling/texting whom) and all data connection usage events, processed through the cell site(s) that provided service to any of the following crime scene area(s) during the below listed time frame(s). Information shall include telephone numbers dialed, incoming telephone numbers, date, time, duration of the call, registration/connection records, the IMSI and IMEI of the number associated with the cell site(s) (tower(s) dumped), cell tower information (location of cell tower/sector, beginning and ending of each call (first and last of each call), associated eNodeB-ID and Cell ID, gNodeB-ID, Cell ID, Location Area Code (LAC), Cellular ID (CID), switch information, azimuth, tower orientation, signal strength, and latitude/longitude for the following target locations of interest:

Location #1: The cellular towers that provided service to 40°16'58.21"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 11:40-12:55 Hours MDT.

Location #2: The cellular towers that provided service to Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 12:10-12:40 Hours MDT.

Location #3: The cellular towers that provided service to Latitude: 40°16'57.59"N, Longitude: 111°42'31.86"W, for the time period of 9/10/2025 12:20-12:55 Hours MDT.

Location #4: The cellular towers that provided service to Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W for the time period of 9/8/2025 20:10-20:25 Hours MDT.

And any available HSS (Home Subscriber Server), HLR (Home Local Registry), VLR (Visitor Local Registry) records showing subscriber equipment that was idle but still connected to the provider's network (on but not placing a call, text, or data connection but were in the same area as referenced above connecting to the network).

2. All Cell Site List(s) (CSLs) of all cell-sites in which the above tower dump(s) are located within identified locations, and all surrounding cell sites within the region/switch /LAC /TAC serving gateway. Cell site lists to include switch, cell site number, name, physical address, longitude and latitude, all sectors associated with each cell-site, azimuth, and beamwidth of each related sector. If multiple technologies (CDMA, UMTS, GSM, LTE, 3G, 4G, 5G, etc.) are referenced in the records, all appropriate corresponding cell site lists will also be provided.

3. Any records of equipment failures, maintenance, cell site overloads, or other outages that tend to show whether any of the listed cell sites were not operating normally during the above-specified time period.

4. And any and all available Specialized Location Records related to all calls, text and data connection location information and transactions (registration of network events), related to all specialized carrier records that may be referred to as LOCDBOR (Location Database of Record), Historical Mobile Locate (HML), NELOS (Network Event Location System), RTT (Real Time Tool), PCMD (Per Call Measurement Data), TDOA (Time Difference of Arrival) or Timing Advance Information, Mediation Records, E9-1-1, and/or Historical GPS/Mobile Locate Information which shows GPS location (longitude and latitude) and Cell-Site and sector of the device in reference to the listed location(s) above in relationship to connecting to the network for the Specialized Location Records, the listed distance location(s) in the "Target Locations of Interest List" are to clarify the geographical search parameter:

Location #1: A distance of 1900 ft radius around, Latitude: 40°16'58.21"N, Longitude: 111° 42'46.94"W, for the time period of 9/10/2025 11:40-12:30 Hours MDT.

The area is further described as the immediate area related to the area of 746 W 800 S, Orem, UT 84058.

Location #2: A distance of 1900 ft radius around, Latitude: 40°16'42.28"N, Longitude: 111° 42'46.94"W, for the time period of 9/10/2025 12:10-12:40 Hours MDT.

The area is further described as the immediate area related to the area of UVU Losee Building, Orem Utah 84058.

Location #3: A distance of 1900 ft radius around, Latitude: 40°16'57.59"N, Longitude: 111° 42'31.86"W, for the time period of 9/10/2025 12:20-12:55 Hours MDT.

The area is further described as the immediate area related to the area of 562 W 800 S, Orem, UT 84058.

Location #4: A distance of 1900 ft radius around, Latitude: 40°16'42.28"N, Longitude: 111° 42'46.94"W for the time period of 9/8/2025 20:10-20:25 Hours MDT.

The area is further described as the immediate area related to the area of UVU Losee Building, Orem Utah 84058.

6. For the search areas described above, the cellular provider is required to disclose all records and other information (not including the contents of all communications made) and all cellular device interactions with the network that generated location information that falls within the defined search distance during the corresponding time frame(s) listed above, including records that identify:

7. The unique identifiers for each wireless device that generated a Timing Advance record within the search for each location, including Electronic Serial Numbers (ESN), Mobile Electronic Identity Numbers (MEIN), Mobile Identification Numbers (MIN), Subscriber Identity Modules (SIM), Mobile Subscriber Integrated Services Digital Network Numbers (MSISDN), International Mobile Subscriber Identifiers (IMSI), International Mobile Equipment Identities (IMEI), and the make and model of the device.

8. The starting and ending date/time of the usage event along with the duration.

9. For each communication with the network the cell site and the "sector" (i.e. the face(s) of the cell site(s)) that received a radio signal from the locally served wireless device for both starting and ending points of communication; 10. The service type for the communication. The source telephone numbers associated with each communication (including the number of the locally served wireless device).

11. The estimated latitude and longitude (along with the confidence level) and the distance from the tower for both the starting and ending points of the communication contained within the specialized location records.

12. These records should include records about communications and cellular device interactions with the network that were initiated before or terminated after the time frame (s) identified above if some part of the communication occurred during the relevant time frame(s) above.

13. Format of records: The records sought must be provided in machine-readable form (i.e. computer files), such as Excel spreadsheets. Those files and any special instructions necessary to read them, for example, a Cell Site List and Records Key that explains the codes associated with any reports being sent, may be provided either by emailing them to the affiant or providing a link to a portal for downloading.

T Mobile, AT&T, and Verizon are ordered NOT to disclose the nature of this investigation to any of their customers who are subject to this search and shall not take any adverse action against their customers who are subject in this investigation.

and that said property or evidence:

Was unlawfully acquired or is unlawfully possessed;

has been used or is possessed for the purpose of being used to commit or conceal the commission of an offense; or

is evidence of illegal conduct.

Affiant believes the property and evidence described above is evidence of the crime or crimes of 76-5-201- Criminal Homicide.

The facts to establish the grounds for issuance of a Search Warrant are:

#### OFFICER TRAINING AND EXPERIENCE

I am currently assigned to the Special Victims Unit for the Utah County Sheriff's Office. I have been through the POST training academy and have been trained and certified as a Utah Peace Officer since April 2015, starting with Lehi Police Department for 6 years which consisted of approximately 3 years on patrol with another approximately 2 and a half years in the special victim's unit. I then moved to work for the Utah County Sheriff's Office and in my first 3 years there, I was assigned to the law enforcement patrol unit. In my time on patrol, I have investigated a wide variety of cases including DUI's, drugs, domestic violence, thefts, frauds, assaults, sex offenses, crimes against children as well as undercover work within the special victim's unit and as part of the FBI Child Exploitation Task Force. During my time as a police officer, I have been trained and certified as a drug recognition expert and have done dozens of drug evaluations. I have had several DUI arrests both involving alcohol and drugs.

While working for Lehi Police Department in the special victim's unit I worked crimes against children with an emphasis in online sex crimes. I was a task force officer with the FBI Child Exploitation Task force and started working with them in February 2018 through

the rest of my time with Lehi PD. During that time, I have worked and been part of hundreds of arrests for online crimes against children. I have also been the lead detective on several sex crimes, property crimes and all manner of crimes against people such as attempted homicide.

I am currently assigned to the Special Victims Unit (SVU) with the Utah County Sheriff's Office and am primarily assigned to work cybercrimes involving the sexual exploitation of minors. During my time as a sworn officer, I have investigated thousands of cases which have led to successful convictions in the court system. I have been trained as a forensic interviewer and have been to several interview and interrogation trainings and applied what has been taught in my investigations. As an SVU detective I have investigated several cases involving the sexual exploitation of children, online enticement of children and even homicide. In my current assignment I am investigating online crimes against children. I have also attended and completed the training at the ICAC bootstrap academy. I have since been approached by the FBI Child Exploitation Task Force and was reinstated as a Task Force officer with them. My experience in investigations has been refined and is continually improving as I further my career. I have also attended and completed the training at the ICAC bootstrap academy. I have since been approached by the FBI Child Exploitation Task Force and was reinstated as a Task Force officer with them. My experience in investigations has been refined and is continually improving as I further my career.

I have investigated, domestic violence cases, stalking cases, and many cases involved in threats both in person and online through emails, texts, and social media. I have investigated homicides, attempted murder, aggravated assault, electronic communication harassment and similar offenses. In my career, personal life, and experience, I have learned that people store a wide range of material on their cell phones. I have learned that when people are threatened, there is often a record of those threats on their phones. This record may take the form of screenshots of public or private communications like social media posts, cached websites, records of websites, social media, and other apps which show content accessed by the user, personal notes, emails, texts, and other communications which describe the threats the user has received to others like loved ones, associates and people who can help protect the threatened person.

I have investigated cases where surveillance footage has captured images of suspects, crimes, and evidence. Many businesses have video surveillance systems which have been helpful in identifying the facts of the cases I have investigated and the identities of witnesses and suspects.

The following information was obtained by your affiant from police officers, multiple video recordings posted on social media websites, Utah Valley University campus surveillance cameras and those who witnessed the incident.

On September 10, 2025, Charles James Kirk was at the Utah Valley University (UVU) campus in Orem, Utah, for a political event. Mr. Kirk is a conservative political activist who was scheduled to speak at an event in the courtyard area on the UVU campus. The courtyard area is to the west of the Losee Center building. According to video recordings, Charles was wearing a white T-shirt and dark pants, sitting under a white canopy in a courtyard of the campus facing to the east. Charles was holding a microphone and speaking to a crowd. While speaking into the microphone, a loud gunshot was heard at approximately 1223 hours, and Charles appeared to have been hit in the neck. Blood was seen coming out of the left side of his neck as he fell over to his left. Charles was

transported to the Timpanogos Regional Hospital in Orem. Charles was pronounced deceased at the hospital.

Investigators reviewed the Utah Valley University surveillance cameras. While reviewing the surveillance cameras, investigators observed an individual on the rooftop of the Losee Center building on the UVU campus at the time of the shooting. Hereafter, the unidentified individual will be referred to as "Suspect". Based on surveillance camera footage, Suspect appears to be a white male with dark colored hair, wearing a blue colored hat, sunglasses, a long sleeve black shirt with a picture of an American flag and an eagle printed on the shirt, dark colored jeans, and white/gray shoes with white colored shoelaces (the shoes appear to be consistent with Chuck Taylor/Converse style shoes). Suspect is also carrying a dark colored backpack on his back. Suspect walks with a distinctive gait. Prior to the shooting, Suspect appears to walk with a stiff, right leg and at a relatively slow pace. Suspect's ability to bend his right leg appears to be restricted. The Investigators were able to track Suspect's movements on the UVU campus, starting at approximately 1150 hours on 9/10/2025.

At approximately 1150 hours, a UVU surveillance camera first captured Suspect walking across a grassy area north of Campus Drive at approximately 800 West. Suspect walks south through the parking lot and approaches a pedestrian tunnel that runs underneath Campus Drive. Suspect pauses briefly before entering the tunnel. Before entering tunnel, Suspect pauses at the top of the stairs and pulls out what appears to be a cellphone from his right pocket using his right hand at approximately 1153 hours. Suspect eventually puts what appears to be a cellphone back in his right pants pocket using his right hand. Suspect walks down the stairs and noticeably keeps his right leg mostly straight while walking down the stairs into the tunnel. Suspect walks through the tunnel and into the parking garage area. Suspect walks up the stairs to the second level of the parking garage. While walking up the stairs in the parking garage, Suspect continues to keep his right leg straight. As Suspect approaches the landing on the stairs between the first and second floor, it appears as though there is something bulging out from Suspect's waistband area as he walks up the stairs. The bulge appears to be underneath Suspect's black shirt and on the right side of Suspect's waistband area.

At approximately 1202 hours, Suspect is observed walking on the north side of the Losee Center building, walking with the same gait as observed earlier. Suspect walks south on the sidewalk on the east side of the Losee Center building. Suspect enters the Losee Center building through a set of doors on the southeast corner of the Losee Center building. At approximately 1215 hours, Suspect is observed walking up the stairs that lead to the common area adjacent to the Losee Center building. Suspect walks to a short concrete wall that separates the common area from the rooftop of the Losee Center building. At approximately 1217 hours, Suspect climbs over the short wall and appears to crouch down on the north side of the wall on the rooftop. At approximately 1222 hours, Suspect stands up and starts running across the rooftop of the Losee Center building. Suspect runs to the west side of the rooftop and appears to scoot along the rooftop area as he gets closer to the edge of the rooftop. At approximately 1222 hours, Suspect lays down in a prone position near the edge of the rooftop and appears to be facing west, in the direction of the courtyard area.

The rooftop of the Losee Center building overlooks the courtyard area where the event featuring Charlie Kirk was taking place. The Losee Center building is east of the courtyard area. At approximately 1223 hours, Suspect stands up suddenly from the edge of the rooftop and sprints north on the rooftop of the Losee Center building. This sprinting motion

is in stark contrast to the slow and restricted gait observed by Suspect in earlier surveillance camera footage. Suspect runs to the northeast corner of the Losee Center building and approaches the edge of the rooftop. Suspect places a dark colored item on the rooftop and proceeds to lower himself off the rooftop. Suspect drops off the rooftop onto the grass below. Suspect runs north near the parking lot to the east of the Losee Center. At approximately 1224 hours, Suspect runs north across the Campus Drive road.

The area to the north of Campus Drive road where Suspect crossed over is a grassy area with trees on the edge of the UVU campus. Investigators discovered a bolt action rifle wrapped in a dark colored towel. The rifle was determined to be a Mauser Model 98, .30-06 caliber bolt action rifle. The rifle had a scope mounted on top of it. Investigators noted inscriptions that had been engraved on casings found with the rifle. Inscriptions on a fired casing read "Notices Buldge OWO what's this?". Inscriptions on the three unfired casings read: "hey fascist! CATCH! (up arrow symbol, right arrow symbol, and three down arrow symbols)". A second unfired casing read "O Bella ciao, Bella ciao, Bella ciao, Ciao, ciao!". A third unfired casing read "If you read This, you are GAY Lmao".

Investigators also discovered a shoe impression on the northeast corner rooftop edge of the Losee Center building. This shoe impression was located in the vicinity where Suspect climbed down from the rooftop. The shoe impression is consistent with the shoe sole characteristics of a Converse/Chuck Taylor shoe.

Based on the above information and through your affiant's training and experience in working many violent crimes cases including shootings, homicides and assaults, I know that it is common for not only the suspects in these cases but as well the victims in these cases to possess valuable information regarding the investigation on their electronic devices, mostly their cellular telephones.

Investigators are seeking authority to seize the following items;

Information regarding an "Area Dump Request" of the cell towers and sectors through which the communications were sent and received, including other precise location information such as TRUECALL and/or TIMING ADVANCE and/or RTT records.

Any location related data that would provide additional information in reference to the IMSI /IMEI connected to the tower during the time periods requested. This would include any estimated latitude and longitude of the device. Any estimates in relation to the device's distance from the cell site. This information is referred to as many different things that are not limited to but shall include, any PCMD (Per Call Measurement Detail), RTT (Round-trip Time), NELOS (Network Event Location System), or data associated with the E-911 system.

These records shall include any records in which communications with the tower were initiated before or terminated after the dates and times specified below, as long as part of the communication occurred during the relevant time periods of this warrant.

The telephone call number and unique identifiers for each wireless device in the vicinity of the tower ("the locally served wireless device") that registered with the tower, including Electronic Serial Numbers ("ESN"), Mobile Electronic Identity Numbers ("MEIN") Mobile Identification Numbers "MIN" Subscriber Identity Modules ("SIM"), Mobile Subscriber Integrated Services Digital Network Numbers ("MSISDN"), International Mobile Subscriber Identifiers ("IMSI"), and International Mobile Equipment Identities ("IMEI");

The source telephone numbers associated with each communication (including the number of the locally served wireless device). The specific sectors (or tower face) that received a radio signal from each locally served wireless device. Investigators are seeking information regarding the cellular towers that provided service to the areas listed in the items to be seized section. This information is also subject to deletion from the service providers within a very short time period.

Many cellular service providers maintain antenna towers ("cell towers") that serve specific geographic areas. Each cell tower receives signals from wireless devices, such as cellular telephones, in its general vicinity. These cell towers allow the wireless devices to transmit or receive communications, such as telephone calls, text messages, and other data. The tower closest to a wireless device does not necessarily serve every call made to or from that device.

In addition to a unique telephone number, one or more unique identifiers identify each cell phone. Depending on the cellular network and the device, the unique identifiers for a cell phone could include an Electronic Serial Number ("ESN"), a Mobile Electronic Identity Number ("MEIN"), a Mobile Identification Number ("MIN"), a Subscriber Identity Module ("SIM"), a Mobile Subscriber Integrated Services Digital Network Number ("MSISDN"), an International Mobile Subscriber Identifier ("IMSI"), or an International Mobile Equipment Identity ("IMEI").

In my training and experience, I have learned that T-Mobile, Verizon, and AT&T are companies that provide cellular telephone access to the general public. I also know that providers of cellular telephone service have technical capabilities that allow them to collect and generate information about the locations of the cellular telephones to which they provide service, including cell-site data, also known as "tower/face information" or "cell tower/sector records" and more precision location information such as TrueCall or Timing Advance records. Cell-site data identifies the "cell towers" (i.e., antenna towers covering specific geographic areas) that received a radio signal from the cellular telephone and, in some cases, the "sector" (i.e., faces of the towers) to which the telephone connected. These towers are often a half-mile or more apart, even in urban areas, and can be 10 or more miles apart in rural areas. Furthermore, the tower closest to a wireless device does not necessarily serve every call made to or from that device. Accordingly, cell-site data provides an approximate location of the cellular telephone but is typically less precise than other types of location information, such as E-911 Phase II data or Global Positioning Device ("GPS") data.

Based on the above facts, there is reason to believe that the records desired in this affidavit would identify which wireless devices were near the suspect's location at the time of the homicide. This information will assist law enforcement in identifying persons present near the suspect's location before, during and after the time of the homicide and serve to eliminate or support any investigative actions to follow.

Investigators also seek an order for T Mobile, AT&T, and Verizon to NOT disclose the nature of this investigation to any of their customers who are subject to this search and shall not take any adverse action against their customers who are subject in this investigation. It is known through your affiant's training and experience that premature notification of such investigative techniques would unnecessarily risk this investigation because if a suspect were to gain knowledge that they are being investigated they are likely to flee this jurisdiction in an attempt to avoid arrest and or prosecution.

A search warrant is being requested in accordance with Utah Code Title 77 Chapters 23b, 23c, or 23f. These chapters stipulate that a government entity must seek a warrant to require a provider to disclose location information, stored or transmitted data, electronic information transmitted by the owner to a remote computer service or through an electronic communication service, the contents of an electronic communication in electronic storage of an electronic communication

service, or identifying information for an electronic device. Utah code mandates such a demand can only be made pursuant to a warrant issued under the Utah Rules of Criminal Procedure, making a subpoena unsuitable in this context.

Before May, 2019 some of this data could be obtained through an investigative subpoena. However, since then Utah Code Chapter 23c of Title 77 was amended to expand the definition of electronic information to potentially encompass the data mentioned in this warrant affidavit. Subsequent amendments to Chapters 23b and 23f further delineated specific data that required a warrant for access. Out of an abundance of caution the State is therefore seeking a warrant.

Based on the facts set forth in this affidavit and the pursuant to the provisions of 18 U.S.C. §2703 and the Utah Rules of Criminal Procedure Rule 40, your affiant asks that a search warrant for the above items will be granted and the court order for production of the aforementioned described records or information.

WHEREFORE, your affiant prays that a Search Warrant be issued for the seizure of said items in the daytime.

#### APPLICATION TO SEAL SEARCH WARRANT AND RELATED DOCUMENTS:

Your Affiant requests, pursuant to Utah Rule of Crim. P. 40(m) that the search warrant, application, and affidavit or other recorded testimony upon which the warrant is based, to include this application for an order sealing such documents, be SEALED until 03/11/2026 for the following reasons:

- cause a substantial risk of harm to a person's safety;
- pose a serious impediment to the investigation;

The identity of the suspect involved in this case has not yet been identified and I believe should information contained in this affidavit be released, it could pose a serious impediment to the investigation or cause a substantial risk of harm to the safety of others.

**I declare under criminal penalty of the State of Utah that the foregoing is true and correct.**

Executed on: 11th day of September, 2025 @ 06:49 PM by /s/ MICHAEL GEORGE CARLE

In the City of Orem, County of Utah, State of Utah, there is now certain property or evidence described as:

NOTICE: This warrant application seeks judicial authorization for the disclosure of reverse-location information of electronic devices near a crime at or near the time of the crime. If authorized, the warrant allows law enforcement to obtain historical location information of all devices within the area described in the warrant during the specified time from entities in possession of the relevant data. The electronic devices captured in the warrant may be owned or used by both alleged criminal perpetrators and individuals not involved in the commission of a crime. For this reason, any warrant issued must require the anonymization of all devices associated with the reverse-location information.

1. Historical cellular site call detail records and stored text message transaction data (a.k.a. cellular tower dump), including, but not limited to: All incoming/outgoing calls; and/or originating or terminating numbers involving both phone numbers associated with the usage event (who's calling/texting whom) and all data connection usage events, processed through the cell site(s) that provided service to any of the following crime scene area(s) during the below listed time frame(s). Information shall include telephone numbers dialed, incoming telephone numbers, date, time, duration of the call, registration/connection records, the IMSI and IMEI of the number associated with the cell site(s) (tower(s) dumped), cell tower information (location of cell tower/sector, beginning and ending of each call (first and last of each call), associated eNodeB-ID and Cell ID, gNodeB-ID, Cell ID, Location Area Code (LAC), Cellular ID (CID), switch information, azimuth, tower orientation, signal strength, and latitude/longitude for the following target locations of interest:

Location #1: The cellular towers that provided service to 40°16'58.21"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 11:40-12:55 Hours MDT.

Location #2: The cellular towers that provided service to Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 12:10-12:40 Hours MDT.

Location #3: The cellular towers that provided service to Latitude: 40°16'57.59"N, Longitude: 111°42'31.86"W, for the time period of 9/10/2025 12:20-12:55 Hours MDT.

Location #4: The cellular towers that provided service to Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W for the time period of 9/8/2025 20:10-20:25 Hours MDT.

And any available HSS (Home Subscriber Server), HLR (Home Local Registry), VLR (Visitor Local Registry) records showing subscriber equipment that was idle but still connected to the provider's network (on but not placing a call, text, or data connection but were in the same area as referenced above connecting to the network).

2. All Cell Site List(s) (CSLs) of all cell-sites in which the above tower dump(s) are located within identified locations, and all surrounding cell sites within the region/switch /LAC /TAC serving gateway. Cell site lists to include switch, cell site number, name, physical address, longitude and latitude, all sectors associated with each cell-site, azimuth, and beamwidth of each related sector. If multiple technologies (CDMA, UMTS, GSM, LTE, 3G, 4G, 5G, etc.) are referenced in the records, all appropriate corresponding cell site lists will also be provided.

3. Any records of equipment failures, maintenance, cell site overloads, or other outages that tend to show whether any of the listed cell sites were not operating normally during the above-specified time period.

4. And any and all available Specialized Location Records related to all calls, text and data connection location information and transactions (registration of network events), related to all specialized carrier records that may be referred to as LOCDBOR (Location

Database of Record), Historical Mobile Locate (HML), NELOS (Network Event Location System), RTT (Real Time Tool), PCMD (Per Call Measurement Data), TDOA (Time Difference of Arrival) or Timing Advance Information, Mediation Records, E9-1-1, and/or Historical GPS/Mobile Locate Information which shows GPS location (longitude and latitude) and Cell-Site and sector of the device in reference to the listed location(s) above in relationship to connecting to the network for the Specialized Location Records, the listed distance location(s) in the "Target Locations of Interest List" are to clarify the geographical search parameter:

Location #1: A distance of 1900 ft radius around, Latitude: 40°16'58.21"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 11:40-12:30 Hours MDT.

The area is further described as the immediate area related to the area of 746 W 800 S, Orem, UT 84058.

Location #2: A distance of 1900 ft radius around, Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W, for the time period of 9/10/2025 12:10-12:40 Hours MDT.

The area is further described as the immediate area related to the area of UVU Losee Building, Orem Utah 84058.

Location #3: A distance of 1900 ft radius around, Latitude: 40°16'57.59"N, Longitude: 111°42'31.86"W, for the time period of 9/10/2025 12:20-12:55 Hours MDT.

The area is further described as the immediate area related to the area of 562 W 800 S, Orem, UT 84058.

Location #4: A distance of 1900 ft radius around, Latitude: 40°16'42.28"N, Longitude: 111°42'46.94"W for the time period of 9/8/2025 20:10-20:25 Hours MDT.

The area is further described as the immediate area related to the area of UVU Losee Building, Orem Utah 84058.

6. For the search areas described above, the cellular provider is required to disclose all records and other information (not including the contents of all communications made) and all cellular device interactions with the network that generated location information that falls within the defined search distance during the corresponding time frame(s) listed above, including records that identify:

7. The unique identifiers for each wireless device that generated a Timing Advance record within the search for each location, including Electronic Serial Numbers (ESN), Mobile Electronic Identity Numbers (MEIN), Mobile Identification Numbers (MIN), Subscriber Identity Modules (SIM), Mobile Subscriber Integrated Services Digital Network Numbers (MSISDN), International Mobile Subscriber Identifiers (IMSI), International Mobile Equipment Identities (IMEI), and the make and model of the device.

8. The starting and ending date/time of the usage event along with the duration.

9. For each communication with the network the cell site and the "sector" (i.e. the face(s) of the cell site(s)) that received a radio signal from the locally served wireless device for both starting and ending points of communication; 10. The service type for the communication. The source telephone numbers associated with each communication (including the number of the locally served wireless device).

11. The estimated latitude and longitude (along with the confidence level) and the distance from the tower for both the starting and ending points of the communication contained within the specialized location records.

12. These records should include records about communications and cellular device interactions with the network that were initiated before or terminated after the time frame(s) identified above if some part of the communication occurred during the relevant time frame(s) above.

13. Format of records: The records sought must be provided in machine-readable form (i.e. computer files), such as Excel spreadsheets. Those files and any special instructions necessary to read them, for example, a Cell Site List and Records Key that explains the codes associated with any reports being sent, may be provided either by emailing them to the affiant or providing a link to a portal for downloading.

T Mobile, AT&T, and Verizon are ordered NOT to disclose the nature of this investigation to any of their customers who are subject to this search and shall not take any adverse action against their customers who are subject in this investigation.

and that said property or evidence:

Was unlawfully acquired or is unlawfully possessed;

has been used or is possessed for the purpose of being used to commit or conceal the commission of an offense; or

is evidence of illegal conduct.

Affiant believes the property and evidence described above is evidence of the crime or crimes of 76-5-201- Criminal Homicide.

**YOU ARE THEREFORE COMMANDED:**

to make a search in the daytime of the above-named or described person, vehicle, item, and/or premises for the herein-above described property or evidence and if you find the same or any part thereof, retain such property in your custody subject to the direction of a prosecutor or an order of this Court.

**ORDER TO SEAL**

Based upon the Application to Seal in the accompanying Affidavit in Support of Search Warrant, IT IS HERBY ORDERED that that the search warrant, application, and affidavit or other recorded testimony upon which this search warrant is based, to include the application for an order sealing such documents, is SEALED until 03/11/2026.

Dated: 11th day of September, 2025 @ 07:26 PM /s/

## RETURN TO SEARCH WARRANT

NO. 3212941

The personal property listed below or set out on the inventory attached hereto was taken from the person of Service Provider 1:

T-Mobile and subsidiaries (i.e. Mint mobile, Metro, Sprint, etc.)

Attn: Court Order Team

4 Sylvan Way

Parsippany, NJ. 07054

Fax: (973) 292-8697

Service by email: LERINBOUND@T-Mobile.com

Service Provider 2:

AT&T and subsidiaries (i.e. Cricket, etc.)

ATTN: AT&T Wireless National Compliance Center

11760 US Highway 1, Suite 300

North Palm Beach, FL 33408

Fax: (888) 938-4715

Service by email: glde@att.com

Service Provider 3:

Cellco Partnership d/b/a Verizon Wireless and subsidiaries (i.e. Visible, Tracfone, etc.)

Verizon Security Assistance Team (VSAT)

Attn: Custodian of Records

180 Washington Valley Road

Bedminster, NJ 07921

Fax: (888) 667-0026

Service by email: VSAT.CCT@one.verizon.com, by virtue of a search warrant dated the 11th day of September, 2025, and issued by Magistrate KRAIG POWELL of the FOURTH DISTRICT COURT - ALL DEPARTMENT:

Tower Dump data from all three carriers.

I, Detective MICHAEL GEORGE CARLE of Utah County Sheriff's Office, by whom this warrant was executed, do swear that the above listed or below attached inventory contains a true and detailed account of all the property taken by me under the warrant, on the 11th day of September, 2025.

All of the property taken by virtue of said warrant will be retained in my custody subject to the order of this Court or of any other court in which the offense in respect to which the property, or things taken, is triable.

**I declare under criminal penalty of the State of Utah that the foregoing is true and correct.**

Executed on: 9th day of October, 2025 @ 08:28 AM by /s/ MICHAEL GEORGE CARLE
